

Aim:Implementing Advanced Visualization Techniques and Customizations.

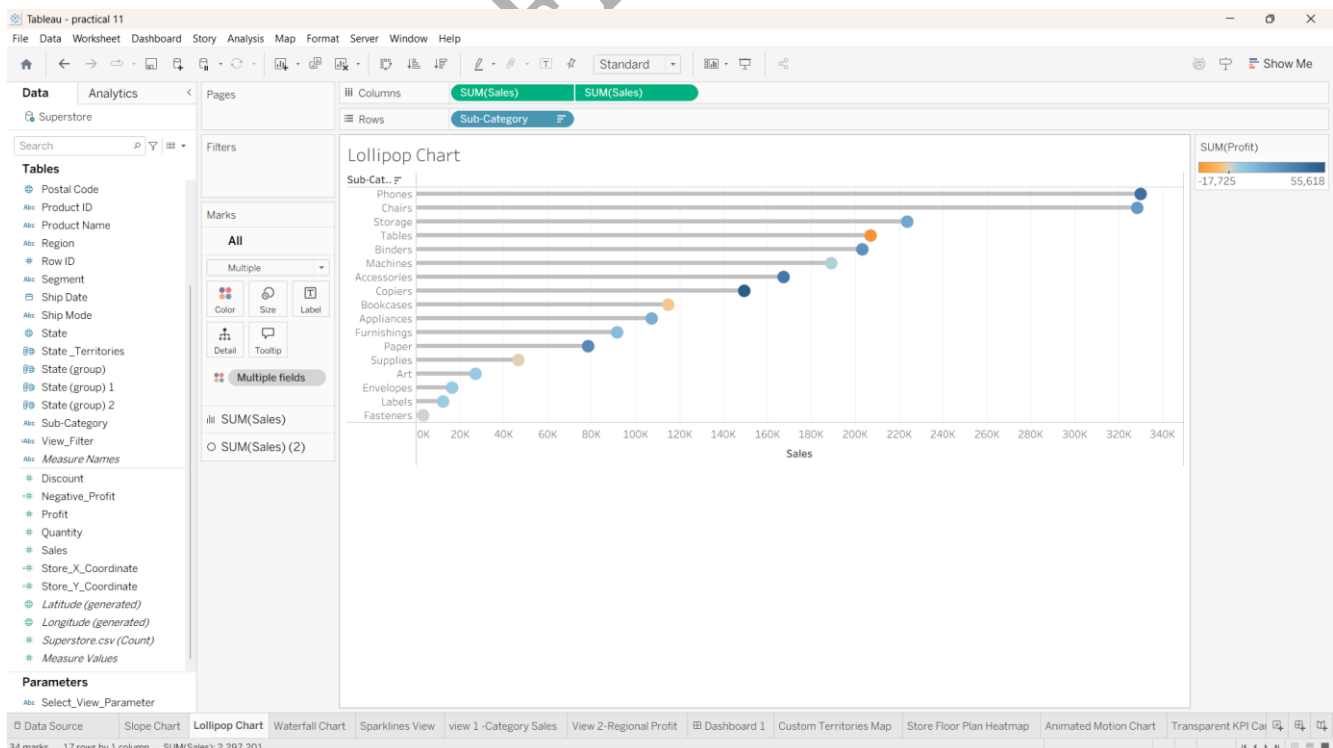

Part 1: Year-over-Year Progression Slope Chart

Compares 2014 vs 2017 total sales across all 17 sub-categories using discrete milestone years, line marks, and line-end labels.

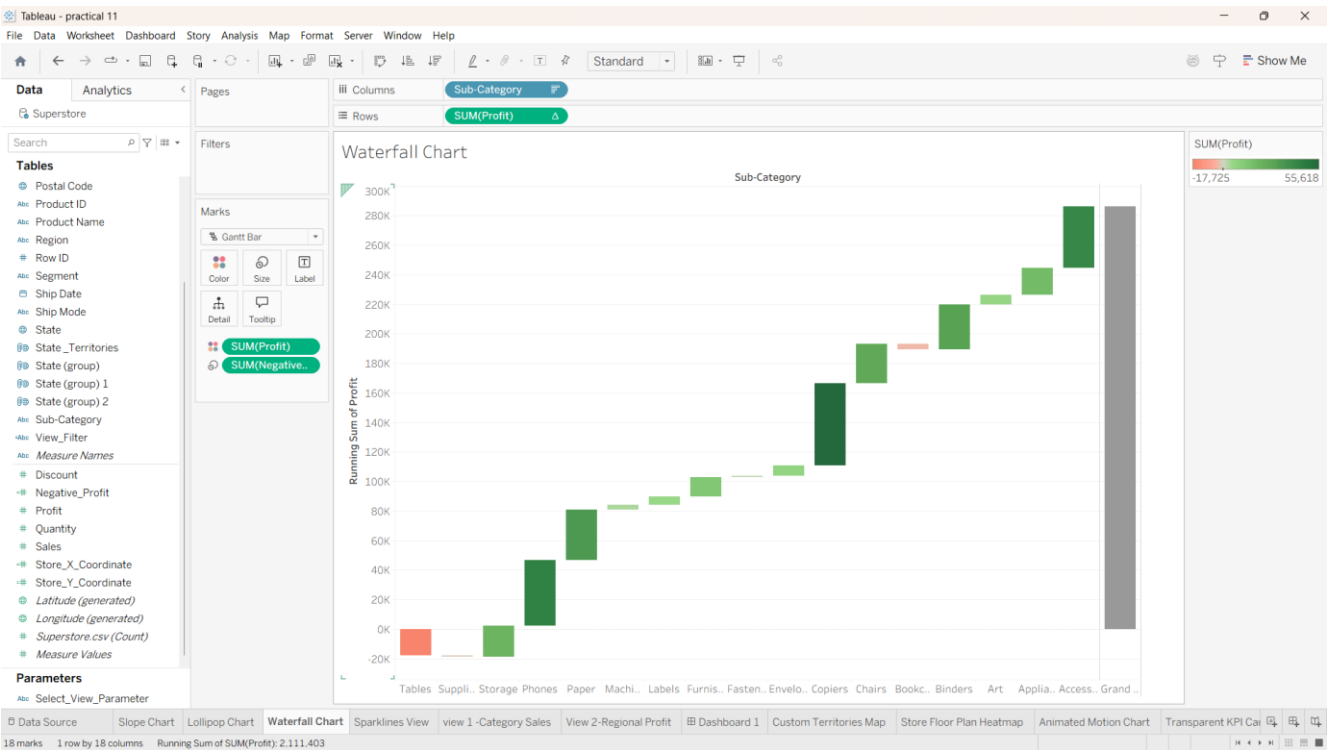

Part 2: Dual-Axis Lollipop Chart (Sales & Profit)

Thin gray bar stems representing Sales capped with circular heads sized and colored by Profit (diverging palette), sorted descending.

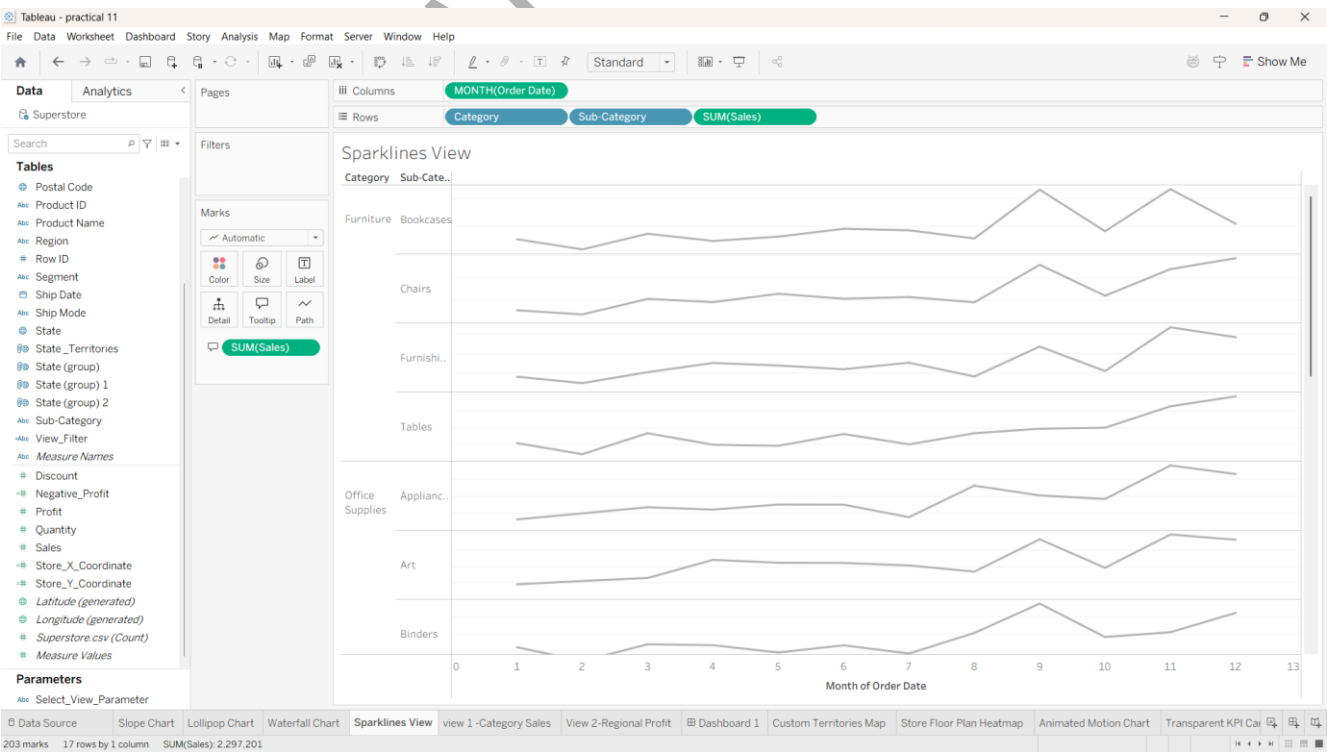

Part 3: Waterfall Chart with Stepping Stones

Cumulative profit flow across Sub-Categories using a Running Total table calculation, Gantt bar marks sized by -[Profit], and a Grand Total anchor.

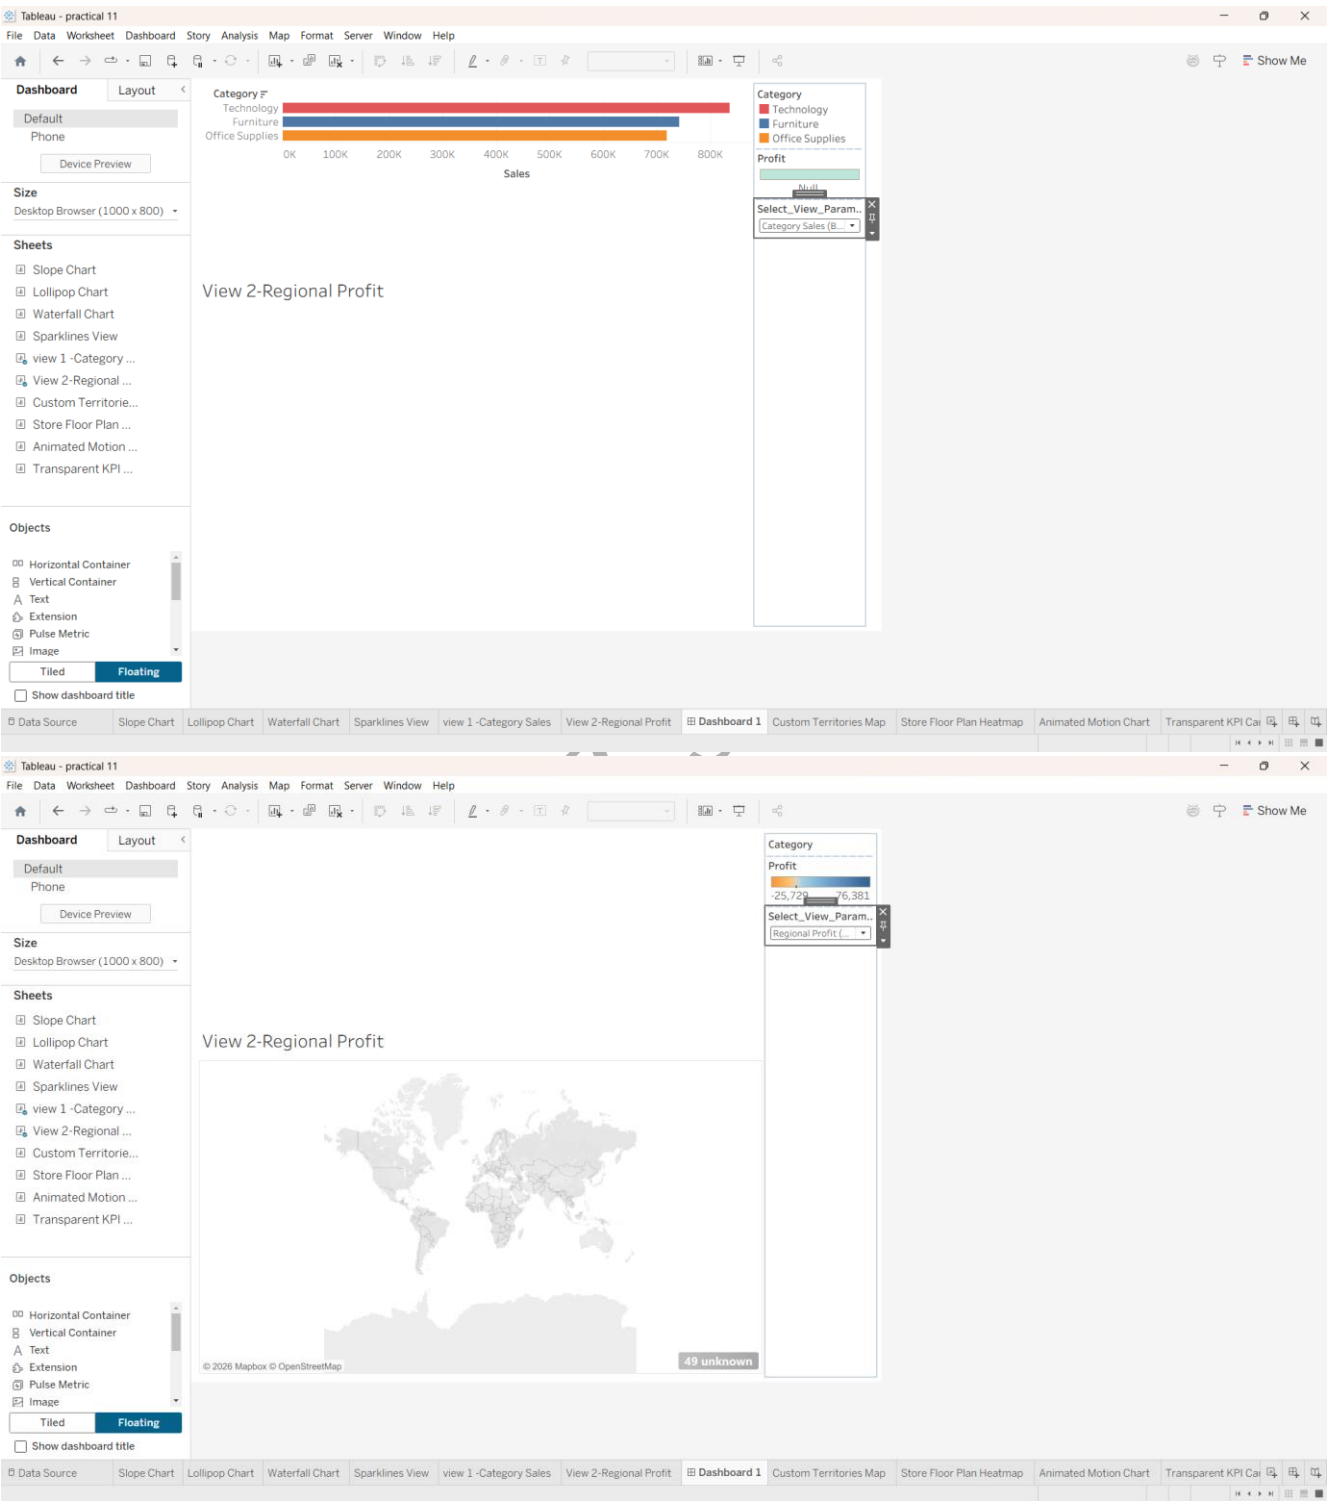

Part 4: Sparklines Table with Min/Max Milestones

Compact monthly continuous trend micro-lines for each Sub-Category with independent axis ranges, zero chart ink (hidden headers & lines), and min/max labels.

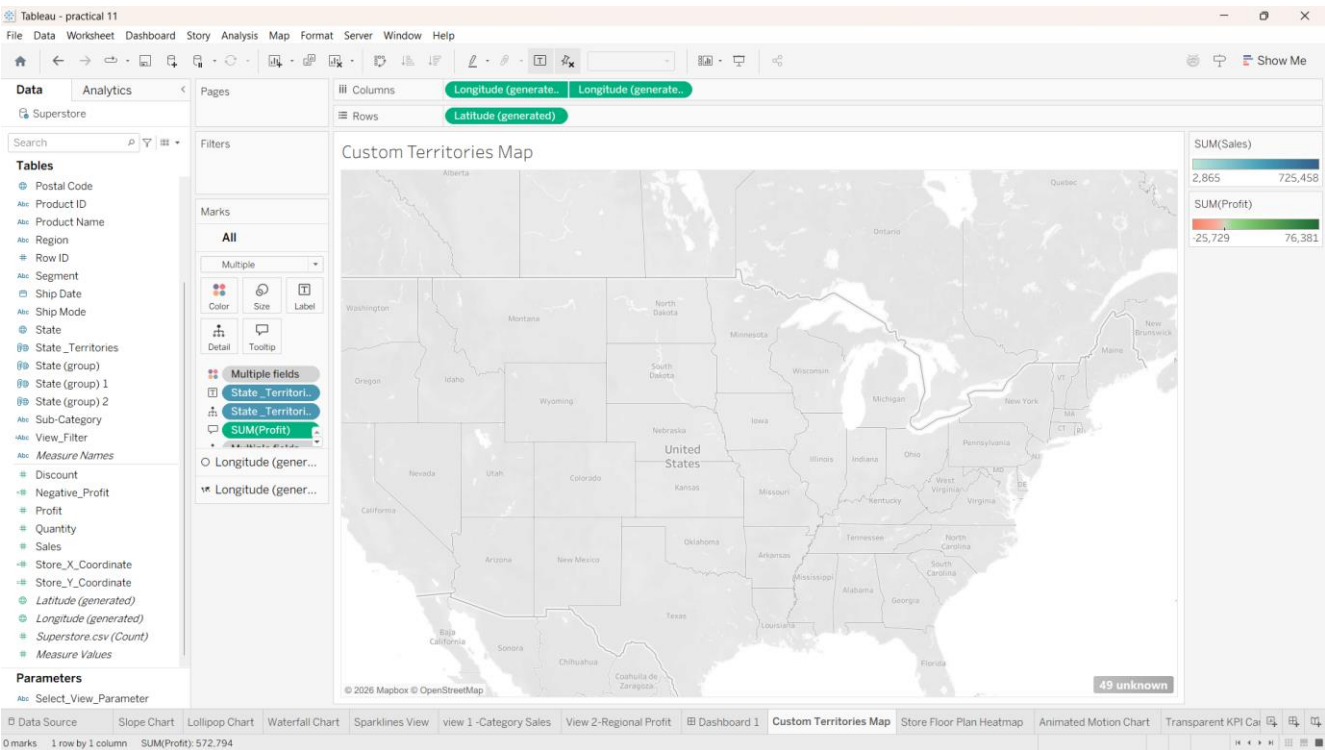

Part 5: Dynamic Sheet Swapping Dashboard

Vertical layout container dynamically alternating between 'Category Sales (Bar)' and 'Regional Profit (Map)' driven by a string parameter and title suppression.

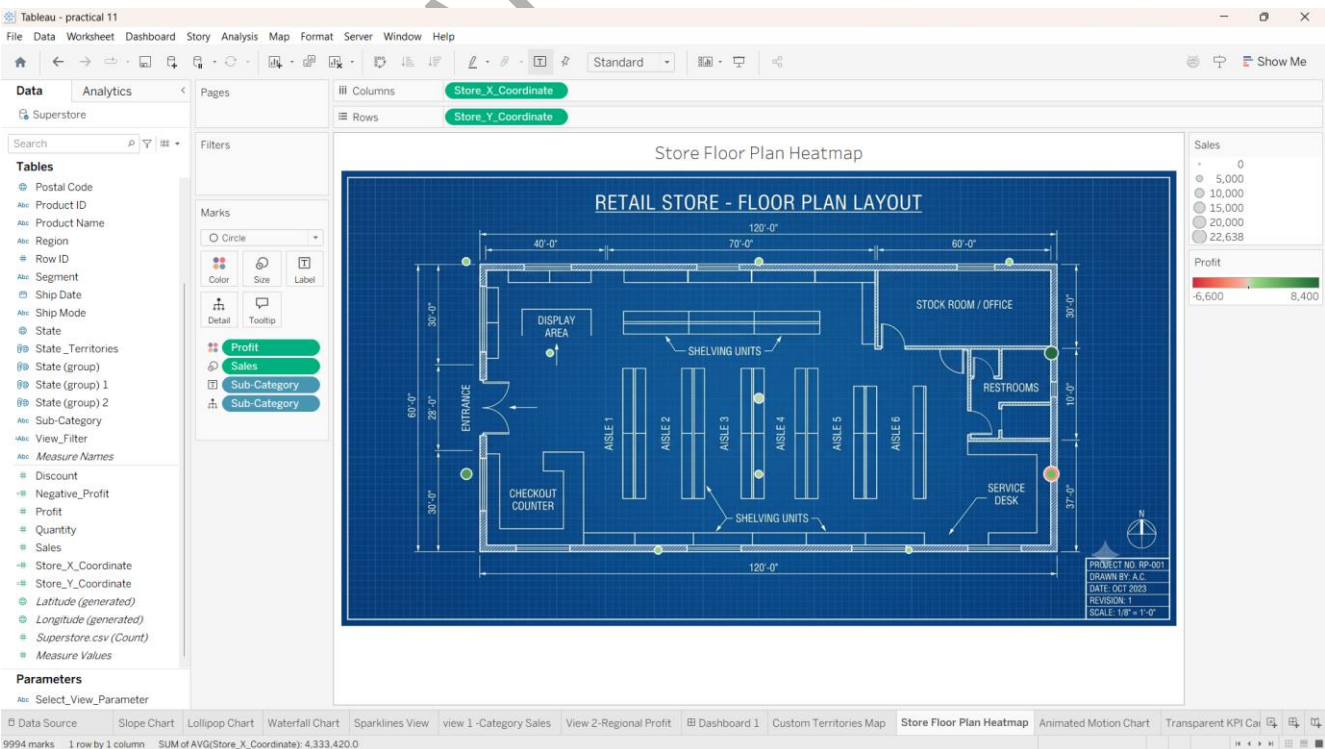

Part 6: Custom Geographic Territories Map

State groupings fused into regional sales zones (Pacific & Mountain, Midwest, Atlantic, South) rendered as unified polygon territories with dual-axis state markers.

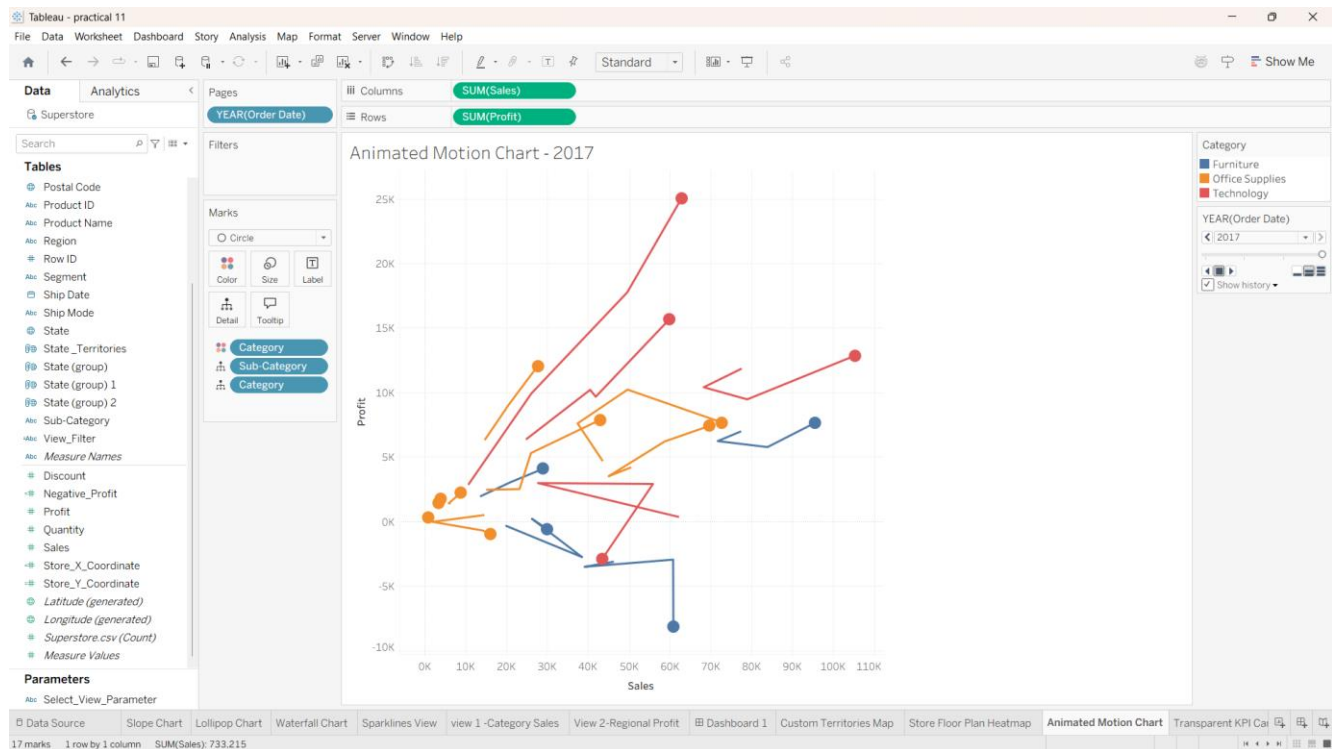

Part 7: Background Image Store Floor Plan Heatmap

Custom blueprint mapped to Store_X_Coordinate and Store_Y_Coordinate fields, plotting sub-category footprint (Sales size) and profit health (Color).

Part 8: Animated Motion Chart (Pages Shelf)

Scatter plot (Sales vs Profit) animated over discrete Order Date years using the Pages shelf player with persistent history trails enabled.

Part 9: Transparent Floating Dashboard Layering

Modern dark-themed dashboard (#1E293B) layering a 100% transparent KPI card and the animated motion chart as floating objects over the floor plan/map.
